Donkey Kong Country: Tropical Freeze is a platform game in which you control Donkey Kong™ through adventures full of puzzles and traps on various islands. With help from your friends, set out to rescue the islands from the Snowmads of the North Sea. In two-player mode, you can control Diddy Kong™, Dixie Kong™, or Cranky Kong™.

Donkey Kong

This king of the jungle loves bananas. His mighty power is second to none, and time and again he must use it to protect Donkey Kong Island.

Diddy Kong

Small but dependable, Diddy Kong has been Donkey Kong's companion for many an adventure. The Barrel Jet on his back lets him hover above the ground.
Dixie Kong

Diddy Kong's girlfriend. Not only does her long, golden ponytail look good, but if she spins it incredibly fast, she can propel herself into the air. She can even lift Donkey Kong off the ground!

Cranky Kong

Donkey Kong's hardheaded, curmudgeonly elder. He can use his cane to achieve great heights as well as easily cross spikes or thorny patches.

Funky Kong

A fun-loving surfer just back from a chillaxing vacation. He runs Funky's Fly 'n' Buy and is extremely proud of it.
The Snowmads

Hailing from the northern seas, these foes have frozen Donkey Kong Island and seek to claim it as their own.

Race to reach the end of a level as fast as you can! Before you begin, you can select which type of Kong Barrel you'll find on your way and check your current ranking for the level.

- Time Attack is only available in one-player mode and on levels that have already been conquered.
- On levels with multiple Slot Machine Barrels, your goal is the regular one and not the hidden one.
- If you select Offline in the Time Attack options, you will not be able to upload records or view the leaderboards.
Battle across numerous islands while fighting off enemies, collecting bananas, and solving puzzles as you go.

One-Player Mode

Health

The top hearts show Donkey Kong's health, and the bottom hearts show the health of the partner. Taking damage in any way, be it from traps or enemy attacks, will decrease your health.

◆ In one-player mode, damage taken will affect the partner's health first. The partner will disappear if all his or her health is lost.

Kong POW meter

This meter fills up as you collect bananas. When it is full, you can unleash a Kong POW against your foes.

Air meter

This is only displayed when you are in water, and it will decrease little by little while you are submerged. Be careful! If you run out of air, you will start taking damage. You can restore the air meter by touching bubbles, surfacing, or getting out of the water entirely.
You lose a life when you lose all of your health or fall into a pit. A Red Balloon will be used to continue the game from the beginning of the level or the last Checkpoint.

Lost a Life

You lose a life when you lose all of your health or fall into a pit. A Red Balloon will be used to continue the game from the beginning of the level or the last Checkpoint.

Game Over

If you lose a life when there are no Red Balloons left, it is game over. Select Continue to receive four Red Balloons and continue the game.
**Two-Player Mode**

The meters are displayed individually for Donkey Kong and the partner, and unlike in one-player mode, the character who takes damage will be the one to lose health.

- If you take damage while the partner is on Donkey Kong’s back, Donkey Kong and the partner will take turns losing health. When underwater, they will share one air meter.

You'll begin the game with a partner, and both Kongs can enjoy the adventure together.

**Play as a Team**

Player 1 will play as Donkey Kong, and Player 2 will play a partner.

**Joint Play**

If the partner jumps on Donkey Kong's back, the pair will be able to execute joint actions and Kong POWs. Player 1 will perform jumps and control hearts, Kong POW meter, and air meters.
vehicles while Player 2 provides support with attacks from a distance, such as shooting peanuts.

---

Leave No Kong Behind!

If Donkey Kong and the partner are separated by too great a distance, one of them may end up being pushed off the game screen. If that happens, the one pushed off the screen will reappear next to the partner after a short delay.

◆ If a character enters a Rocket Barrel or Barrel Cannon, the other character will automatically be moved to his or her location after a short delay.

---

Losing a Life

If a character loses a life, that character will disappear from the level. He or she can return to the level at the cost of one Red Balloon, so long as the other character does not also lose a life. If both characters lose a life and disappear from the level, it will take two Red Balloons for them to continue the game from either the beginning of the level or the Checkpoint.

---

Returning to the Game
To spend a Red Balloon and return to the level, the player must press the button shown on the top-left side of the screen. The returning character will descend into the level in a Kong Barrel floating from a Red Balloon. The other character must then touch the Kong Barrel to free his or her buddy.

◆ The player in the Kong Barrel can shake the Wii Remote or Nunchuk to move the Kong Barrel closer. If you are controlling the Wii U GamePad with ¤, press ○/△. If you are controlling the Wii U GamePad with □, press ▶/←.

◆ If you fail to get out of the Kong Barrel before it falls off the screen, you will lose a life. Be careful!

If the characters have no Red Balloons remaining and lose a life, it is game over. Select Continue to receive four Red Balloons and continue the game.
