The Player Search System

The Player Search System (PSS) enables you to find other players who are playing a *Pokémon™ X* or *Pokémon™ Y* game at the same time you are, so you can play together. Local wireless connects you to nearby players, while your internet connection lets you see players from around the world.

Friends

Displays players registered on your Nintendo 3DS™ or Nintendo 3DS XL system's friend list.

Acquaintances

Displays players who are not registered on your Nintendo 3DS or Nintendo 3DS XL system's friend list, but with whom you have traded or battled at least once.

Passersby

Displays players who do not belong to either of the previous categories.

Note: Players who are not available are shown in grey.
